

Multidisciplinary Engineering, Surveying, Materials Testing & 3D Laser Scanning

We execute full disciplined engineering through a single point of contact, providing our clients with innovative and practical project solutions.

Here's how:

- Lean execution, delivering on time and on budget
- Nationwide OQM certification, ensuring the quality management oversight your projects deserve
- 40 years of corporate experience, 500+ diversified professionals, and an extensive portfolio of Oil & Gas and Infrastructure projects

Multidisciplinary Engineering, Technical and Environmental Services

Acden Allnorth is a joint venture (JV) company owned 51 percent by Acden (an Athabasca Chipewyan First Nation company) and 49 percent by Allnorth. Acden Allnorth has been approved by the Northern Alberta Aboriginal Business Association (NAABA) as a qualifying Aboriginal Business. The day-to-day operations are managed by Allnorth with oversight by a management board made up of equal representatives from both Acden and Allnorth.

Allnorth is a mid-sized multidisciplinary engineering solution provider with a proven track record of delivering projects safely and reliably to scope, schedule and budget. We have more than 500 staff across 15 offices. We are well known for our professional accreditation, flexibility and ability to move quickly. Allnorth's client relationships are built on trust, innovation, and timely response to issues.
