

Waste & Recycling Services

Customizable management plans and top quality service delivery means your priorities are met at every visit.

Here's how:

- Integrated solutions makes us your one-stop service provider
- Our commitment to innovation ensures you receive cost effective services
- Over 30 years experience

Acden is 100% community-owned by the Athabasca Chipewyan First Nation

Waste & Recycling Services

Acden Environment is one of the largest providers of waste management, recycling, and landfill management services in northern Alberta. We serve commercial and industrial clients throughout the Fort McMurray region and Greater Edmonton. We also offer residential and event bin services. We are proud to provide the following:

Industrial and Commercial Waste Collection Services

Acden has over 30 years experience providing collection services to remote areas and those with restrictive access requirements. We can accommodate any bin configuration to suit all traditional waste streams and have the ability to design and manufacture specialty bins to suit your unique needs.

- Front Load Bin Services
- Roll Off Bin Services
- Luger Bin Services

Landfill Management

Acden Environment has the proven expertise to meet and surpass all landfill and transfer station requirements. We have SWANA accredited managers and operators prepared to operate and govern waste streams, mobilize equipment and perform the due diligence required to manage a world class sanitary site.

Recycling Management

From initial collection to the sale of goods back into markets, our recycling management approach will help you minimize the impact of your business and reduce your environmental footprint.

Hazardous Waste Management

Acden Environment is a recognized leader in supplying hazardous material management solutions. Whether as the hands-on complete site solutions provider or by utilizing one of many Acden business partners, the collection, sorting, packaging and transportation to certified facilities is handled with the utmost care and caution.

Scrap Metal Management

Utilizing valued partnerships, Acden Environment can provide the turnkey collection, sorting, handling and sale of all scrap metals. Whether ferrous or non-ferrous, we will facilitate the entire process from collection to the final sale, maximizing your return.

Specialized Transportation

From the movement of large equipment such as cranes, to components like exchangers, we can transport with precision and safety.
